

分数のひき算

帯分数-真分数 = 真分数

年 組 番

名前

次の計算をしましょう。

$$1\frac{1}{5} - \frac{3}{5} = \frac{6}{5} - \frac{3}{5} \\ = \frac{3}{5}$$

$$1\frac{2}{6} - \frac{5}{6} = \frac{8}{6} - \frac{5}{6} \\ = \frac{3}{6} = \frac{1}{2}$$

$$1\frac{2}{9} - \frac{3}{9} = \frac{11}{9} - \frac{3}{9} \\ = \frac{8}{9}$$

$$1\frac{1}{3} - \frac{2}{3} = \frac{4}{3} - \frac{2}{3} \\ = \frac{2}{3}$$

$$1\frac{1}{6} - \frac{3}{6} = \frac{7}{6} - \frac{3}{6} \\ = \frac{4}{6} = \frac{2}{3}$$

$$1\frac{2}{7} - \frac{3}{7} = \frac{9}{7} - \frac{3}{7} \\ = \frac{6}{7}$$

$$1\frac{5}{8} - \frac{7}{8} = \frac{13}{8} - \frac{7}{8} \\ = \frac{6}{8} = \frac{3}{4}$$

$$1\frac{1}{4} - \frac{3}{4} = \frac{5}{4} - \frac{3}{4} \\ = \frac{2}{4} = \frac{1}{2}$$

$$1\frac{4}{9} - \frac{7}{9} = \frac{13}{9} - \frac{7}{9} \\ = \frac{6}{9} = \frac{2}{3}$$

$$1\frac{3}{10} - \frac{7}{10} = \frac{13}{10} - \frac{7}{10} \\ = \frac{6}{10} = \frac{3}{5}$$
