()の中の数の^わ和と^さ差をもとめましょう。

(^{おく}37億, 24億)

$$3700000000 + 2400000000 = 6100000000$$

$$3700000000 - 2400000000 = 1300000000$$

(163億, 139億)

$$16300000000 + 13900000000 = 30200000000$$

$$16300000000 - 13900000000 = 2400000000$$

(823億, 2317億)

$$82300000000 + 231700000000 = 314000000000$$

$$231700000000 - 82300000000 = 149400000000$$

(3572億, 1600億)

$$357200000000 + 160000000000 = 517200000000$$

$$357200000000 - 160000000000 = 197200000000$$

(4839億, 7784億)

$$483900000000 + 778400000000 = 1262300000000$$

$$778400000000 - 483900000000 = 294500000000$$

(^{ちょう}17兆, 53兆)

$$17000000000000 + 53000000000000 = 70000000000000$$

$$53000000000000 - 17000000000000 = 36000000000000$$

(278兆, 809兆)

$$278000000000000 + 809000000000000 = 1087000000000000$$

$$809000000000000 - 278000000000000 = 531000000000000$$

(523兆, 3087兆)

$$523000000000000 + 3087000000000000 = 3610000000000000$$

$$3087000000000000 - 523000000000000 = 2564000000000000$$

(7200兆, 4576兆)

$$7200000000000000 + 4576000000000000 = 11776000000000000$$

$$7200000000000000 - 4576000000000000 = 1624000000000000$$

(3283兆, 1986兆)

$$3283000000000000 + 1986000000000000 = 5269000000000000$$

$$3283000000000000 - 1986000000000000 = 1297000000000000$$
